1. Find the desired length, width, and height of table. Lay out 3 2x4's of desired length in equal distance of the width of the table.

2. Place thin pallet wood onto 2x4’s and screw down. Repeat until table is covered.

3. Place thin pallet wood onto the outside of the table.

4. Cut legs the desired height and screw into the 2x4’s on the underside of the table in each corner.

5. Flip table over and add any finish desired to the wood.
